Property Overview

Infomart Silicon Valley is the most efficient and sustainable data center product in the Bay Area. With 100% locally-sourced, renewable energy, 100% recycled water usage, 100% containment solutions, and room for expansion, this data center has it all. To top it off, the management and operations of this facility have received the best score in the world from Uptime Institute's Management & Operations Certification, which is proven by the fact that there have been zero SLA events at this site since inception. For companies that value sustainability, Infomart Silicon Valley should be at the top of your list.
